an independent injury, petitioner otherwise satisfies the regulatory criteria for SIRVA on the Vaccine Injury Table for her alleged injury. Specifically, petitioner had no history of pain, inflammation, or dysfunction of her right shoulder prior to vaccination; pain occurred within forty-eight hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain beyond an independent, co-morbid SLAP tear." *Id.* at 4.
